List of papers

List of papers

**Keynotes**

3 Water sensitive cities: Do we have what it takes to create them?  
T. D. Fletcher

13 Multi-species network water quality modeling: Current examples, future potential, and research needs  
J. G. Uber

**Advances in sensors, instrumentation and communications technologies**

23 Mathematical modelling of a hydraulic controller for PRV flow modulation  
N. AbdelMeguid, P. Skworcow & B. Ulanicki

31 Optimal setting of time-modulated pressure reducing valves in water distribution networks using genetic algorithms  
H. Awad, Z. Kapelan & D.A. Savic

39 Guidance for deployment and deployment of upset early warning systems for wastewater  
R. Bahadlir, w.a. Samllels & R. Ramani

47 Automatic control valves in the Cost-effectiveness of WSS Management: PRV application  
A. Bairos & H.M. Ramos

55 Understanding and managing large sensor networks  
D.D. Ediriweera & I. W. Marshall

63 Flow modulated dynamic pressure control with Aquai-Mod controller  
P. Li, I. Postlethwaite, E. Prempoin & B. Ulanicki

71 Water loss dynamic control by Automatic Meter Readings in water distribution network  
T. Liserra, S. Artina, C. Brogallì & C. Lenzì

79 Detection of illegal branches in pipe systems: A fast and reliable method  
S. Meniconi, B. Brunone, M. Ferrante & C. Massari

83 Identification of leak characteristics in pipe systems by dynamic monitoring  
D. Pavlovoc & M. Ivetic

**Data management including SCADA and GIS**

93 The use of GIS for analysis of water distribution networks  

99 Online time data series pre-processing for the improved performance of anomaly detection methods  
N. Branisavljevic, Z. Kapelan & D. Prodanovic

105 Correlating water consumption behaviour with billing, infrastructure and socio-demographic factors  

113 Optimal pump scheduling with pressure control aspects: Case studies  
P. Skworcow, H. AbdelMeguid, B. Ulanicki & P. Bounds
121 Minimal time of valve closure for fluid transient in water transmission
J. Y. Yu, C. G. Wu & Y.X. Yuan

**Systems modelling, optimisation and decision support**

129 Epanet calibrator - An integrated computational tool to calibrate hydraulic models
N. Abe & P.B. Cheung

135 Use of grey numbers for representing uncertainty in pipe roughness calibration
S. Alvisi & M. Franchini

143 Operation of water distribution systems using risk-based decision making
J. Bicik, D.A. Savic & Z. Kapelan

151 Reliability analysis of water supply systems by the entropy and equivocation theory
A. Boccafoschi & B. Rejtano

159 Modelling and calibration of water distribution networks: A case study from the Wessex region
E.L.S. Boivin, M.A.M. Mansoor, 1 Hidderley & K. Vairavamoorthy

167 Calibration methodology for hydraulic transient models incorporating unconventional dynamic effects

175 Virtual reality based immersion scene simulation system of water distribution network
K. Chang, W. Y. Wu, J.L. Gao & Y.Yuan

181 Robust design of water distribution networks: A comparison of two different approaches
M. C. Cunha & J. J. O. Sousa

189 Modeling of distribution network filling process during intermittent supply
M. De Marchis, C. M. Fontanazzo, G. Freni, G. La Loggia, E. Napoli & V. Notaro

195 A more realistic simulation of areal water distribution system based on an enhanced demand driven model
A. Doglioni, F. Primativo & O. Giustolisi

203 Equivalence of pipes with distributed flow in pressurised pipe networks
M. Ferrante, C. Massari, E. Todini, H. Brunone & S. Meniconi

209 Pressure driven analysis of water distribution networks based on the knowledge of the actual connection to properties
O. Giustolisi, D. B. Laucelli & A. Doglioni

217 Advancements on pipe hydraulic resistance correction in WDN analysis
O. Giustolisi, L. Berardi & E. Todini

225 EIO-LCA based multi-objective design of water distribution systems with NSGA-II
L. M. Herstein, Y.R. Filion & K.R. Hall

233 Hydraulic reliability analysis using a pressure-driven network simulation model
D. B. Laucelli, O. Giustolisi & A. Doglioni
List of papers

241 Computational evaluation of hydraulic system behaviour with entrapped air under rapid pressurization
S. C. Martins, H.M. Ramos & A.B. Almeida

249 Neptune DSS: A decision support system for near-real time operations management of water distribution systems
M.S. Morley, J. Bicik, L.S. Vamvakeridou/Lyroudia, Z. Kapelan & D.A. Savic

257 Pressure-driven analysis of network sections supplied via high-lying nodes
O. Piller & J.E. van Zyl

263 Assessment of the head dependent gradient method with reference to PRAAWDS
E. Siew & T.T. Tanyimboh

269 Water distribution network simulation by a combined steady-state and transient hydraulic solver

277 Multiobjective optimization and multicriteria decision making for water networks
T.T. Tanyimboh, K. Hard, T. Prasad. E. Jarvis & A. Kanyoza

281 Use of relative roughness and changed diameters for old pipes when calibrating an operational water distribution system
A. Vassiljev, M. Martaud & T. Koppel

Real time monitoring, modelling control and understanding the associated uncertainties

289 Umbria region forecasting decision support for hydraulic risk mitigation purposes
N. Berni, C. Pandolfo, F Ponziani, M. Stelluti & A. Viterbo

291 The real time stochastic flow forecast
L. Brezkowa, M. Stary &: P. Dolezal

301 Laboratory, flow loop and real world validation testing of the operational effectiveness of an on-line heuristic security platform for water distribution networks
D. Kroll, K. King & J. Moroney

307 Online modelling of water distribution systems: A UK case study
J Machell. S.R. Mounce &: J.B. Boxall

313 From design tool to real time control - Using a spreadsheet based optimisation tool to minimize borehole pumping costs
R.J. Measures, P. Kichs, R. Grant, H. Attfield & N. Blore

319 On-line hydraulic state estimation in urban water networks using reduced models
Preis, A.J. Whittle, A. Ostfeld &: L Perelman

325 Improving energy efficiency of pumping systems through real-time scheduling systems
L.K. Reynolds & S. Bunn

331 Bayesian-based online burst detection in water distribution systems
M. Romano, Z. Kapelon & D.A. Savic
Developing and implementing a real-time intervention management model for water distribution systems

Water quality modelling

Multi-parameter water quality sensors for water supply systems
A. Aisopou. I. Stoianov. A. Arora. D. O'Hare & N. Graham

On-line monitoring station for water quality assessment

Negative pressures in full-scale distribution system: Field investigation, modelling, estimation of intrusion volumes and risk for public health
M.-C. Besner; G. Ebacher. M. Prévost; B.S. Jung B. Karney. J. Lavoie & P. Payment

A bottom-up approach of stochastic demand allocation in water quality modeling

Effect of spatial correlation among water demands on contaminant transport in a pipe network
S. G. Buchberger & Z. Li

Water quality comprehensive evaluation method for large water distribution network based on clustering analysis

Investigating relationships between discolouration customer contact frequencies and mains properties in drinking water distribution systems
D.M. Cook. P. Spain & C. Wilkes

MUWS (Microbiology in Urban Water Systems) - An interdisciplinary approach to study microbial communities in urban water systems

Optimal placement of booster chlorination stations for disinfection by products minimization
Z. Ohar & A. Ostfeld

Concept for optimized flushing of potable water networks
S. Richardt & A. Korth

Particle related water quality prediction for drinking water distribution systems
K. Ripl. A. Lerch & W. Uhl

Methodology for the skeletonization of water distribution network models with demand aggregation
J. G. Saldarriaga. S. Ochoa. L. Nieta & D. Rodriguez

Rivelin trunk main now test
A.D. Seth. P.S. Husband & J.S. Boxall

A study of wall demand in turbulent pipe flows
K. Sookhak Lari. M. van Reeuwijk & C. Malsimovic

Computing and Control for the Water Industry 2009 - CCWI 2009
List of papers

543  New guidelines for non-domestic water estimation in South Africa
     A. A. Ilemobade J. E. Van Zyl & H. J. Van Zyl

551  On hydraulic power capacity of water supply system
     T. Koppel, L. Ainola & J. Vaabel

557  Analysis of household night-time consumption

563  Analysis of the damping effect of leakage in water pipe systems for different flow conditions
     N. Melo & H. M. Ramos

571  Experimental investigation of characteristic curves of centrifugal pumps working as turbines
     G. Naldi, S. Artina, C. Bragalli, T. Liserra & A. Marchi

577  Leakage detection using pressure sensitivity analysis
     R. Perez V. Puig & J. Pascual

583  Towards the improvement of the efficiency in water resources and energy use in water supply systems

591  Optimizing target hydraulic head for energy efficient operation of variable speed pumps
     Z. Y. Wu

599  Water distribution network leakage analysis modeling based on pattern recognition theory

Asset management and performance modelling

607  Overview of failure mechanism of joints in water distribution networks

613  Fluid-structure interaction in the safety of infrastructures
     A. Cesteiro & H. M. Romos

621  Hybrid genetic algorithms with advanced search for optimized operation of water supply networks

627  Case study in resilience analysis and scheme selection
     C. Henriques & M. Fowler

631  Infrastructure risk management: A probabilistic approach to asset management
     P. M. R. Jonkergouw T. G. Watson A. D. Erskine & M. Petrie

639  I-WARP: Individual water main renewal planner
     Y. Klejner & B. Rajanj

645  Effects of DMA redesign on water distribution system performance
     R. E. Murray W. M. Grayman, D. A. Savic & R. Farmani
651 Preparing considering of economies of scale and adjacent infrastructure works in water main renewal planning  
A. Nafi & Y. Kleiner

659 Asset management optimisation using genetic algorithms and whole life, cost benefit analysis  
Z. Rao, P. Conroy A. Yeowell, S. De Rosa & W. Williams

665 Demand headroom uncertainty modelling for strategic water supply planning  
B. K. P. Acquah D. E. Spiller H. See & N. Morris

673 Extensive analysis of hydraulic parameters in a large set of water distribution systems  
P. M. Vidiga D. I. C. Covas, D. Loureiro, S. T. Coelho & H. Alegre

681 Pump scheduling study on a demand monitoring zone system  
Z. Y. Wu K. Woodword & T. Allen

687 Trade-off analysis between cost and reliability of water distribution systems using genetic algorithms  
W. Wu A. R. Simpson & H. R. Maier

695 A pipe condition assessment model using PROMETHEE  
Y. Zhou K. Vairavamoorthy & F. Grimshaw

**Sustainable urban water management including flooding issues**

703 1D-2D model coupling for urban drainage analysis and optimization  
A.G. Adeogun A. Pathirana B. Gersonius, N.G. Wright & B.F. Sanders

709 Physical and mathematical modeling of surcharged sewer manhole flow  
L. S. Hasfjold & S. Moe

713 Penketh - An integrated approach  
C. J. Hames

719 Conceptual description of a novel three-tiered philosophy for sewer network master planning in South Africa  
H. E. Jacobs & M. Van Dijk

725 Fuzzy model use for evaluation of peak outflow from a river basin during flash flood  
P. Janal & M. Stary

731 On determination of flow routes in a stormwater network using the least squares method  
L. Laanearu I. Annus. A. Vassiljev & T. Koppel

735 Flood wave simulation with 1D-2D coupled models  

741 Vikor method for asset management in Serbian Belgrade Wastewater Services  
I. Milojkovic: & S. Andric

749 An artificial intelligence approach for optimising pumping in sewer systems  
S. Ostojin J. B. Boxall S. R. Mounce & D. Singerton
Comparison of eight rainfall-runoff models for flood simulations
I. Ribarova Pl. Ninov M. Volk F. Melone T. Moramarco E. Safiolea Y. Ponagopoulos M. Zdarewicz
N. Berni & A. Ghinescu

Comparison of rainfall radar and rain gauge data and application lo sewer hydraulic modeling
W Shepherd, A. Schellart, A. Saul & D. Hanson

Modelling water saving in the upper Iskar region
L. S. Vamvakeridou-Lyroudia D. Inman I. Ribarova & DA. Savic

An improved multifractal model for short-term rainfall forecast
L.P. Wang, C. Maksimovic & C. Onof

**Likely impacts of climate change**

Review of quantitative methods for evaluating impacts of climate change on urban water infrastructure
W. M. Grayman. J. A. Goodrich & C. McCoy-Simandle

Assessing the impact of climate change on water treatment plant design and operation
Z. Li S.G. Buchberger. R.M. Clark & Y. J. Yang

Characterizing the impact of uncertain discount rates and carbon pricing on the optimal design and operation of the Kamalsaleh water transmission system
E. Roshani & Y. R. Filion

Making the earth move: Modelling the impact of climate change on water pipeline serviceability
C.W Goodchild. T. C. Rowson & M. O. Engelhardt
